<b>TO:</b>  Jon D. Johnston, SSES	<b>FROM:</b> Ms. Dagny Stewart Channel 2 News-Nashville 615-248-7221	<b>DATE</b> 10-20-82	<b>TIME</b> 12:30pm
<b>SUBJECT</b> Saad Oil sites in Nashville, TN: status of investigation			
<b>SUMMARY OF COMMUNICATION</b> <p>Ms. Stewart called concerning both the Trousdale Blvd. and Silver Springs sites associated with Saad Oil Company. She said that the Channel 2 news people have been following these sites for the last three years, and she wanted to know what EPA's recent sampling studies had shown. I told her that the data was not back from the lab yet, and that she would need to discuss the matter with Fred Stroud when it was received. She asked if we had documented off-site contamination; our recent samples were for this purpose so we don't know yet. She was particularly interested in the well water samples from the Silver Springs area and wanted a summary of our results. She was told these were not back either. She asked what compounds had been found on Saad's property (Trousdale) and I referred her to Fred Stroud. She said she would call back each week until we had something to tell her. I told her we didn't have a definite date for when the data would come back from the lab but when we get something and have reviewed it we would have more to tell her.</p>			
<b>CONCLUSIONS, ACTION TAKEN OR REQUIRED</b>
